

Day 01 - Fundamentals of Git & GitHub

Objective

Learn Git and GitHub basics.

Topics Learned

- What is Git
- What is GitHub
- Version Control
- Git Workflow
- Staging Area
- Commits
- Branching and Merging

Commands Learned

git init

git clone

git status

git add .

git commit -m

git branch

git checkout

git merge

git log

Key Concepts

Git

Git is a distributed version control system.

GitHub

GitHub is a platform for hosting Git repositories.

Staging Area

Acts as a checkpoint before creating commits.

Hands-On Practice

- Installed Git
- Configured username and email
- Created local repository
- Added files
- Created commits
- Practiced branching

Screenshots

(Add terminal screenshots here)

Key Takeaway

The staging area helps developers review changes before committing them.
